Junior Cybersecurity Engineer | SOC | Threat Intelligence | Cloud Security

Education

École Nationale Supérieure d'Informatique et d'Analyse des Systèmes (ENSIAS)

Engineering Degree – Cybersecurity, Cloud & Mobile Computing

2024 – Present

Rabat, Morocco

CPGE Moulay Driss

Classe Préparatoire Math-Physics

2022 – 2024

Fès, Morocco

Experience

CHU Hassan II de Fès – Cybersecurity Intern

Jul – Aug 2026

Design and Deployment of a Security Operations Center (SOC) Lab

IT & Security Department | Fès, Morocco

- Designed and deployed an end-to-end SOC environment in an isolated VMware lab, integrating Elastic Security (SIEM/EDR), Suricata, pfSense, Shuffle (SOAR), MISP, TheHive, and Cortex.
- Automated the alert investigation workflow using Shuffle, including alert extraction, deduplication, VirusTotal/MISP enrichment, email notification, and automated case creation in TheHive.
- Conducted red-team simulations mapped to the MITRE ATT&CK framework to validate detection and response capabilities, while evaluating protection against web attacks using ModSecurity and OWASP CRS.

Symolia Groupe – Cybersecurity Intern

Jul – Aug 2025

Cyber Threat Intelligence Platform

IT / Security Department | Rabat, Morocco

- Designed and deployed a Cyber Threat Intelligence pipeline integrating CVE data, VirusTotal, Shodan, and OSINT sources for continuous threat monitoring and IOC enrichment.
- Correlated and mapped identified threats to the MITRE ATT&CK framework to support threat contextualization, prioritization, and SOC-oriented reporting.
- Developed a real-time threat intelligence dashboard and containerized the platform using Docker to improve scalability and deployment.

Projects

Private Cloud Hardening

2026

End of year project (PFA)

- Built and secured an OpenStack private cloud infrastructure with DMZ, database, and management network zones using OVN security groups for network segmentation.
- Implemented defense-in-depth controls including SSH hardening, UFW, Fail2ban, ModSecurity/OWASP CRS, and Wazuh for centralized monitoring and vulnerability detection.
- Validated the infrastructure through penetration testing scenarios from Kali Linux and assessed hardening improvements using Lynis and applicable CIS Benchmark controls.

Smart Lock with ZKP Authentication

2025

End of year project (PFA)

- Developed a secure smart lock system using Zero-Knowledge Proofs to authenticate users without transmitting or storing raw credentials.
- Implemented asymmetric cryptography for the challenge-response protocol to prevent Man-in-the-Middle (MITM) attacks.
- Integrated an Android (Java) mobile client with a Spring Boot backend secured via JWT session management and Spring Security.

Technical Skills

- **SOC & Detection:** Elastic Security, Wazuh, Splunk, SIEM, EDR, Detection Engineering
- **SOAR & Incident Response:** Shuffle, TheHive, Cortex, Alert Triage, Case Management
- **Threat Intelligence:** MISP, VirusTotal, Shodan, OSINT, MITRE ATT&CK, IOC Enrichment
- **Network & Application Security:** Suricata, pfSense, Nmap, Wireshark, Burp Suite, Metasploit, ModSecurity
- **Cloud & Infrastructure:** OpenStack, Docker, VMware, Linux, Windows Server
- **Programming:** Python, Java, C, JavaScript
- **Languages:** Arabic (Native), French (Fluent), English (Fluent)

Certifications

- **AWS Certified Cloud Practitioner** – Amazon Web Services Training and Certification
- **CCNA: Introduction to Networks** – Cisco Networking Academy
- **CCNA: Switching, Routing, and Wireless Essentials** – Cisco Networking Academy
